

Integrated EPB assessments

A pathway for effective EPBD implementation

iEPB is a EU LIFE project involving 12 international partners.

It aims to upgrade the energy performance of the EU's building stock by increasing the synchrony between multiple EPB assessments.

iEPB is set to revolutionize the landscape of energy certifications for the future of sustainable buildings.

Co-funded by
the European Union

How?

- Developing a Common Data Model
- Addressing existing deficiencies in EPC design and implementation
- Enhancing the quality of EPB Assessments
- Engaging stakeholders and supporting the market

Towards 5 main objectives:

Integration and synchronization of EPCs with other assessment instruments

Facilitating the collection, aggregation, and analysis of data for building performance assessments

Improving data accessibility and user-friendliness of EPCs

Establishing more EU-compliant, consistent, and accurate EPB Assessments and Certification schemes

Ensuring applicability in operational environments

Keep up with the project
